A REGULATION relating to off-highway vehicles; revising provisions governing the issuance of grants from the Account for Off-Highway Vehicles; revising provisions relating to applications for such grants; revising provisions governing the supervision of projects funded by such grants; and providing other matters properly relating thereto.

Legislative Counsel's Digest:

Existing law creates: (1) the Off-Highway Vehicles Program in the State Department of Conservation and Natural Resources; and (2) the Commission on Off-Highway Vehicles in the Department. (NRS 232.1585, 490.067) Existing law authorizes the Commission to award grants of money from the Account for Off-Highway Vehicles to fund certain projects related to off-highway vehicles. (NRS 490.068, 490.069) The Commission is required to adopt regulations setting forth who may apply for such grants and the manner in which a grant application may be submitted. (NRS 490.068) Existing regulations establish the procedure to be used by the Commission to award grants and the requirements for the supervision of projects for which a grant has been awarded. (NAC 490.127-490.1465) **Sections 2 and 3** of this regulation define necessary terms. **Sections 9, 11, 12, 17, 19 and 23-28** of this regulation transfer certain responsibilities regarding the awarding of grants and supervision of projects from the Commission to the Program. **Section 4** of this regulation requires the Program to monitor funded projects to ensure that maintenance is occurring in accordance with the grant agreements.

Section 13 of this regulation requires a person who seeks to apply for a grant for a project on public land to obtain a letter of support for impacting the land from the governmental entity that has jurisdiction over the land. **Section 14** of this regulation requires a person who seeks to apply for a grant for a project on private land to have an interest in the real property on the private land sufficient to operate and maintain the project for a period of at least 25 years or for the normal life of the project, whichever is longer.

Section 15 of this regulation requires a grant application to comply with the provisions of the applicable request for grant applications issued by the Program.

Existing regulations require a grant application to include evidence that the applicant has consulted and obtained approval for the proposed project from each appropriate federal, state or local governmental entity. (NAC 490.137) **Section 16** of this regulation requires an applicant to

include evidence that the applicant has consulted and obtained approval for the proposed project from each appropriate private entity as well.

Existing regulations establish certain information which must be included in a request for grant applications. (NAC 490.1385) **Section 19** of this regulation requires certain additional information to be included in the request.

Section 27 of this regulation requires a grantee to show due diligence in moving forward with a project for which a grant was received and authorizes the Program to terminate the grant agreement upon 30 days' written notice if the grantee fails to do so.

Section 29 of this regulation requires a grantee to submit quarterly reports and coordinate a final inspection of the project. **Section 29** also requires the Program, if it finds that a project has not been completed satisfactorily, to withhold final payment for the project until the project is completed satisfactorily.

Existing regulations require the Commission to appoint a grant scoring committee to review and score applications for off-highway vehicle grants with the assistance of the Office of Grant Procurement, Coordination and Management in the Department of Administration. (NAC 490.139-490.1405) **Sections 5, 20-22 and 30** of this regulation remove references to the grant scoring committee and the Office of Grant Procurement, Coordination and Management and instead require the Program to review and rank grant applications with the input of a technical advisory committee formed by the Director of the State Department of Conservation and Natural Resources and submit the ranked applications to the Commission.
